2 Citations and explanations:

Claims 1-14

Document: 1 JP 2002-304822 A (Sony Corporation)

18 October 2002, full text, Figs. 1-29

Document 1 describes that when a free space on a recording medium currently recording lowers, writing of content information into the recording medium is stopped, and the destination of the content information is switched from the recording medium to an HDD to write the content information into the HDD.

Document: 2 JP 2002-281436 A (Toshiba Corporation)

27 September 2002, full text, Figs. 1-6

Document 2 describes that when a storage capacity of a DVD-RAM lowers, a recording status is shifted to a hard disk.

Document: 3 JP 2003-85893 A (Sony Corporation)

20 March 2003, full text, Figs. 1-9

Document 3 describes that a recording format of a recording medium is identified to convert music data into a recording format.

Regarding the descriptions in claims 1 and 8, that is, subsequently "... control means for writing the program data into a second recording medium", document 2 (paragraph 0027) describes "recording data onto a hard disc and optical disc in the same format". Regarding the descriptions in claims 1 and 8, that is, "selecting, among a plurality of formats, a format in which the data can be written into the first recording medium", recording prescribed data in a format compatible to a recording medium is a well-known art [see, for example, document 3 (paragraph 0013)].

Regarding claims 2-5 and 9-12, see document 1 (specification, Fig. 2, paragraphs 0033, 0044 and 0077).

Regarding claims 6 and 13, see document 1 (paragraph 0005) and document 2 (claim 6).

Regarding claim 7, a constitution wherein optical discs of a plurality of kinds can be loaded, for example, multi drives and the like, is a commonly used art.

Therefore, regarding claims 1-14, in documents 1-2, applying the above well-know art of document 3 to configure the invention of the present application could be easily conceived of by a party skilled in the art; therefore, they do not appear to involve an inventive step.
